Claims 1, 5-12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Kudo et al. (JP 07-168293).

This patent teaches an article comprising a substrate coated with a layer that can contain a complex of applicants' compound of formula (IV), a water-soluble resin (e.g., gelatin), a cross-linking agent and particles (i.e., pigments). Since this article contains all of the applicants' claimed structural and compositional limitations, it is inherent that the prior art article would function in the manner claimed by applicants. See the machine translation at paragraphs 0044-0046, 0049 and 0073.

Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The election requirement of the last Office action is adhered to and made final for the reasons of record. Claims 2-4 are non-elected.
